SAFFRON Sorting Gauge

JUBILEE DIAMOND INSTRUMENT LIMITED

Gemlogis SAFFRON Sorting Gauge

DESCRIPTION

- A Lever Piece
- B Lever
- C LCD Display
- D On/Off Button
- E Lever Anvil
- F Fixed Anvil
- G Zero Button (Zero setting at any position)
- H mm / Inch Interchanger
- I Battery Compartment
Uses 1 x LR44 Battery Cell

PRINCIPLES OF OPERATION

Congratulations on your purchase of the Gemlogis SAFFRON Sorting Gauge. SAFFRON Sorting Gauge features the most convenient way to measure a gemstone up to 15mm.

1. Slide open the Battery Door (I) and place battery into the battery compartment.
2. Turn on the SAFFRON by pressing On/Off Button (D)
3. Press the Lever Piece (A) all the way down so that the Lever Anvil (E) and Fixed Anvil (F) are touching, then press the Zero Button (G) to reset the gauge to Zero.
4. Hold the sorting gauge and measure the stone by pressing the Lever Piece down and securing the stone between the Lever Anvil and Fixed Anvil. Measurements are shown on the LCD Display (C).
5. Press Inch/mm Button (4) to interchange between the measuring units.

MEASURING METHODS

1. **Tweezer Method** - The SAFFRON Sorting Gauge features a tweezer-like function. It allows the user to pick up a loose stone with ease from multiple angles. It can be operated with one hand thus eliminating the need to use a conventional gauge and tweezer simultaneously..
2. **Table Top Method** - The SAFFRON Sorting Gauge can be placed flat on the table top to quickly measure loose stone in bulk. A great way to segregate stone in various sizes..

PROPER MAINTENANCE

1. Handle with care and avoid dropping the gauge. The mechanisms inside are not shock-resistant and dropping of the gauge will affect its accuracy.
2. Keep anvil (Sliding and Stationary) and all surfaces clean. Dirt stuck on the anvils will affect the accuracy of measurement.
3. Do not leave discharged battery in the battery compartment, leakages will lead to corrosion. The battery should be removed when the gauge is expected to be stored away for an extended period of time.

| Operating Time (Hrs): | 60hrs non-stop.4320hrs standby |

INTERNATIONAL WARRANTY

- Gemlogis SAFFRON Sorting Gauge is covered by a 12 months Factory Warranty.
- Defects in material and workmanship are covered under this warranty. Batteries and replacement of anvils are not covered under this warranty.
- This warranty will be void by unauthorized repair, misuse, modification, and alteration, tempering or accident damage, neglect or improper use.
- This warranties become effective from the date of original purchase.
- Purchaser must fill out the enclosed WARRANTY REGISTRATION FORM and mail it back to the address as stated on the back of this handbook along with a copy of the invoice (bill of sale) within 30 days of purchase.
- If the above criteria is not met, the Gemlogis SAFFRON will be automatically covered by a 90 DAY LIMITED WARRANTY from the date of your SAFFRON purchase.
- In the event that the SAFFRON is no longer available or has been discontinued and warranty coverage is applicable, at the sole discretion of the manufacturer, an equivalent gauge may be substituted in place of the defective SAFFRON.
- The purchaser shall incur the cost for postage insurance and handling for all warranty covered and non-warranty covered repairs.
